SCIENTIFIC PUBLIC REVIEW of Crosetto's 3D-CBS innovative technology

See: www.crosettofoundation.com

June 23, 2008 – ROME, Via G. B. DeRossi, 9, Italy

AGENDA

10:00 AM Opening of proceedings. Introduction of guests of honour (Prof Luigi Marrelli)
10:15 AM Introduction of review, thanks to sponsors (Dr Vincenzo Vigna)
10:30 AM Introduction of questionnaire, which completes phase 1 of the review, and description of phase 2 to compose, with the contribution of external specialists and the public, the final report (Dr Vincenzo Vigna)

11:00 AM Presentation of 3D-CBS technology by inventor Dario Crosetto

12:30 PM. Questions and answers

1:00 PM Lunch break

2:00 PM Specific questions about social and technical objectives

2:20 PM Specific questions about efficiency (where the theoretical limit is, where the other 4,000 PET are placed at the moment in efficiency, how close we can get to the theoretical limit)

2:40 Specific questions on innovative elements of 3D-CBS (detectors, electronics, etc)

3:00 Specific questions on advantages of 3D-CBS and its impact in the reduction of Health Care cost for each life saved from premature cancer death

3:20 PM Specific questions on the obstacles to the implementation of the advantages that can be obtained from the 3D-CBS innovative technology

3:40 PM Completing the questionnaire

4:00 PM End of review and coffee break

4:15 PM Forum. Changing the direction of research: method of verifying the achievement of death's reduction from cancer (taking note of various opinions)

5:00 PM Screening, early diagnosis and cost saving to Health Care (taking note of various opinions)
